

Case Study

Over my 15+ year career as an SEO I have spent something to the tune of \$100,000 between Software and Training. I can hands down say with absolute confidence that this is the best advanced SEO training on the market today. No fluff, no nonsense, straight to the point. Backed by testing and data, Lee equips you with what you need to rank. I think I can let the results speak for themselves. Want to know the best part about the charts below? This is before any external SEO efforts.

Website #1

Website #2
